

the **calibration** centre

Calibration & Repair Service

In association with The Calibration Centre, we can now offer a full calibration, repair and service to most types of electronic test equipment

Calibration

On offer is an extensive calibration portfolio giving the ability to calibrate a wide range of test equipment in house. This includes Pat Testers, 16th Edition Testers, Multimeters, Clamp Meters, Digital Thermometers and Scopes.

Documented Service

Calibration cost includes an equipment service record and recall letter.

Fast Turnaround

Standard service is a 3-4 day turnaround, just drop off the equipment at our trade counter and leave the rest to us. All equipment is mains safety tested upon arrival and cleaned prior to despatch.

Computer Automated Calibration System

Using a fully integrated software system they are able to calibrate your instrument efficiently and at the same time log its process through their laboratory from the moment it arrives to the time it is dispatched.

Calibration Reminder Letters

A free of charge reminder by fax, email or post can be sent to advise you that your instrument is almost due for calibration.

**Just give us a call for a fantastic price
Part P = Yearly Calibration**

Repair

In addition to their calibration facility, The Calibration Centre are also able to offer a repair and service facility to care for your instruments when they are faulty. Standard service is a five day turnaround on most repairs, and unlike most manufacturers they do not quote a standard repair price, they quote on the merit of each repair, and add a labour price, so if only a fuse has gone you will only be charged for a fuse.

They offer detail quotations explaining what is wrong with your instrument, not just the cost to put it right.

In addition to certificates, you will also be issued with a service log, which details the history of your instrument. Each time the instrument is returned this is updated.
